Shubham Kharbad

Kolhapur, Maharashtra **Mobile:** +91 9767423638 **Email:** shubhamkharbad15@gmail.com
GitHub: github.com/shubhamkharbad15-afk **LinkedIn:** linkedin.com/in/shubham-kharbad

Profile Summary

Computer Science undergraduate at Kolhapur Institute of Technology with a strong foundation in C/C++ and Full-Stack Development. Passionate about building scalable web applications and efficient software solutions.

Education

KIT's College of Engineering, Kolhapur **2023 – 2027**
B.Tech in Computer Science and Engineering | **CGPA: 8.74**

Vaidyanath College **2022 – 2023**
Higher Secondary Certificate (HSC) | **Percentage: 81.50%**

Shri Jagmitra Naga Vidyalaya **2020 – 2021**
Secondary School Certificate (SSC) | **Percentage: 99.60%**

Projects

Skillzy – AI Skill Connect Platform GitHub | Live Demo
React.js · FastAPI · MongoDB · AI

- Developed an AI-powered skill-sharing platform that intelligently matches users based on skills and interests.
- Integrated the pretrained Sentence-Transformers model (all-MiniLM-L6-v2, 384-dim embeddings) for semantic profile matching via cosine similarity over a top-50 re-ranked candidate pool, returning a normalized match score (50–98%) with a text-substring fallback.
- Implemented authentication, real-time communication, community features, and gamification to improve user engagement.
- Designed a RESTful FastAPI backend with MongoDB for scalable, low-latency data handling across matching and messaging services.
- Deployed the platform on Vercel ensuring seamless updates and reliable uptime.

PurePic Pro – AI Photo Selection and Enhancement GitHub
Python · OpenCV · Machine Learning

- Developing an offline AI-powered photo culling and enhancement application for professional photographers.
- Built an image quality assessment pipeline for automated scoring and classification, achieving roughly 80–85% accuracy on basic photo sorting tasks.
- Implemented reference-based colour grading (~70–80% match accuracy) and reference-based masking (~50–75%, still under refinement) for consistent photo editing workflows.

SilentShield – AI Toxic Content Blocker GitHub
Chrome Extension · Transformers.js · JavaScript

- Developed a Chrome extension that detects and automatically blurs toxic messages, hate speech, and cyberbullying in real time.
- Built a keyword-matching detection engine achieving roughly 40–60% accuracy, with a DistilBERT (Transformers.js) pipeline integrated for on-device inference in progress toward full deployment.
- Built an analytics dashboard to visualize safety score, threat detection statistics, and browsing history.

Technical Skills

- **Programming Languages:** C++, Python, JavaScript, Java
- **Frontend:** HTML5, CSS3, React.js
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** PostgreSQL, MySQL, MongoDB, Oracle SQL
- **Tools:** Git, GitHub, Docker, VS Code, Postman, CI/CD (GitHub Actions)
- **Core Concepts:** Data Structures and Algorithms (DSA), OOP, DBMS, OS, CN.

Certifications & Participations

- Data Structures and Algorithms in Java – NPTEL
- Complete Web Development Bootcamp – Udemy
- Secured Second Runner-Up position at BGMIT, Mudhol.
- Qualified for the Zonal Finals held in Mumbai.
- Participated in the INVENTRA 2025 Hackathon at KLE College of Engineering.
